PROFESSIONAL SUMMARY

Information Technology professional with experience in technical support, infrastructure, and customer service, working on the identification and resolution of problems related to systems, networks, printers, digital certificates, and the Windows environment.

Currently pursuing a Bachelor's degree in Information Systems and steering my career toward software development, with a specific focus on Web development. I am constantly improving my knowledge in HTML, CSS, JavaScript, and other ecosystem technologies, developing personal projects to strengthen my practical experience and build a solid portfolio.

I possess an analytical profile, a strong aptitude for learning new technologies quickly, and a passion for solving technical problems. I always aim to understand user needs deeply before proposing solutions, combining technical expertise, strong organizational skills, and clear communication to deliver high-quality results.

My goal is to engage in projects that foster my growth as a developer, participate in creating innovative solutions, and contribute effectively to teams that value continuous learning, collaboration, and professional advancement.

PROFESSIONAL EXPERIENCE

NetSolutions

Web Developer and Technical Support

April 2026 – Present

- Active in web development and continuous technical support for enterprise systems.
- Provided direct customer support and led operational training sessions for software utilization.
- Executed preventive and corrective computer maintenance, alongside general hardware and operating system configurations.
- Managed full setup and infrastructure deployment for computers, printers, and corporate servers.

Fênix Colina Participações e Empreendimentos

Production / Logistics Assistant

2021 – March 2026

- Handled comprehensive factory operations, encompassing inventory control, logistics management, and forklift operation.
- Gained practical experience that solidified essential competencies in organization, accountability, and collaborative teamwork.

Lan House

Attendant / Technical Support

2021

- Delivered general customer service and performed technical computer hardware and system maintenance.

DEVELOPMENT PROJECTS

Stock Pro — Inventory Control System

Technologies: [HTML](#), [CSS](#), [JavaScript](#), [IndexedDB](#)

Developed a semi-automatic inventory controller tailored to enhance efficiency, speed, and precision within product management and tracking processes.

CyberChase — Resume Distribution Platform

Technologies: [HTML](#), [CSS](#), [JavaScript](#), [GitHub Pages](#), [Git](#)

Structured a web application to efficiently bridge the gap between candidates and employers, significantly streamlining professional resume publication and job queries.

LootStack — Farm Vaccination Control System

Technologies and Tools: [Angular](#), [TypeScript](#), [Node.js](#), [PostgreSQL](#), [Git](#), [GitHub](#), [VS Code](#)

Designed a robust web application for managing vaccination schedules on farms, implementing granular access controls for Employee and Administrator roles. Features a fully responsive UI for prompt data entry, comprehensive history logs, and robust filtering options by animal type/batch to guarantee reliable reporting and total traceability.

EDUCATION

Bachelor's Degree in Information Systems — Unifeb

In progress: 2024 – 2027

Chemical Technician — Etec Coronel Raphael Brandão

Completed: 2021 – 2023

TECHNICAL SKILLS

Full Stack Development	HTML, CSS, JavaScript, TypeScript, Angular, PHP
Databases	IndexedDB, PostgreSQL, SQL Fundamentals
Version Control	Git, GitHub
Infrastructure & Support	Hardware Maintenance, Computer Networks, Printer and Server Setup, Digital Certificates, Windows Environment, Office Suite

COMPLEMENTARY COURSES

- Introduction to Object-Oriented Programming (Fundação Bradesco)
- IT Fundamentals: Hardware and Software (Fundação Bradesco)
- Data Modeling / Implementing and Administering Databases (Fundação Bradesco)
- Artificial Intelligence and the New Context of Digital Culture (Fundação Bradesco)
- Python in Practice Week (Empowerdata)
- Stronger X — Linux Experience (Grupo Utah)

CORE STRENGTHS

- Highly analytical approach paired with a proven ability to adapt to and master complex technical frameworks.
- User-centric design mindset focused on identifying real-world pain points prior to proposing tech architecture.
- Strong commitment to practical improvement via consistent personal full-stack portfolio projects.
